

New York State Crime Report

Andrew M. Cuomo
Governor

Michael C. Green
Executive Deputy Commissioner

September 2016

Crime in New York State 2015 Final Data

New York State and the FBI use seven Index crime categories as indicators of overall crime trends: murder, rape, robbery, and aggravated assault, which are classified as violent crimes; and the property crimes of burglary, larceny and motor vehicle theft.

This report details Index crime in New York State, its 62 counties and two regions - New York City and the 57 counties outside of the five boroughs - for 2015. Police departments and sheriffs' offices report Index crime to the Division of Criminal Justice Services (DCJS) through the Uniform Crime Reporting and Incident Based Reporting programs.

Index crime rates per 100,000 population statewide and by county and region also are included. DCJS uses county population data from the FBI, which is based on U.S. Census estimates, to calculate those crime rates.

As of 2015, rape statistics reported in New York State conform to the FBI's expanded definition of the crime. The FBI [implemented this change](#) to more accurately reflect the scope and volume of sexual assaults nationwide.

While this report compares Index and violent crime over the 10-year period from 2006 through 2015 and 2015 versus 2014, caution should be used when citing or interpreting any percentage changes. Index and violent crime totals include the number of rapes reported under the expanded definition of the offense. As a result, increases in those crime categories may be attributable in part to the expanded definition.

In addition, this report *does not* include percentage change comparisons between rape statistics reported in 2006 and 2015 or 2014 and 2015.

Appendices 6, 7 and 8 detail additional information about this reporting change and its impact on New York State crime trends.

Index crimes reported by each police department and sheriff's office in the state from 2011 through 2015 are available on the DCJS website:

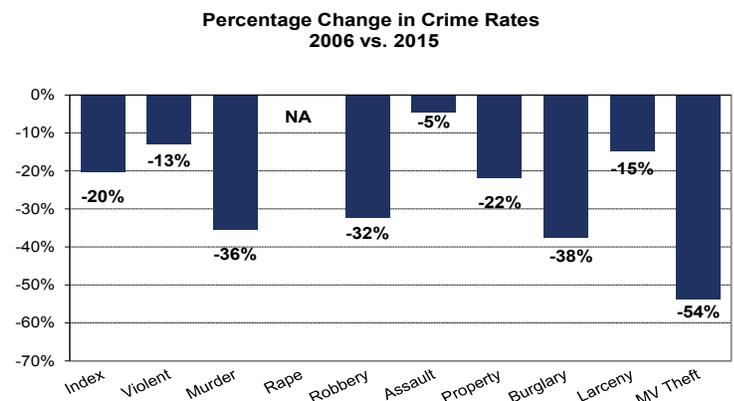

www.criminaljustice.ny.gov/crimnet/ojsa/stats.htm

Change in Crime Rates: 2006 vs. 2015

Crime reached an all-time low in 2015. A total of 390,246 Index crimes were reported, the fewest since statewide reporting began in 1975.

That milestone — surpassing one set in 2014 — resulted in the state's Index crime rate declining by 20 percent when comparing 2006 vs. 2015.

During the same 10-year period, the violent crime rate dropped 13 percent and the property crime rate, 22 percent. Appendix 1 provides additional details.

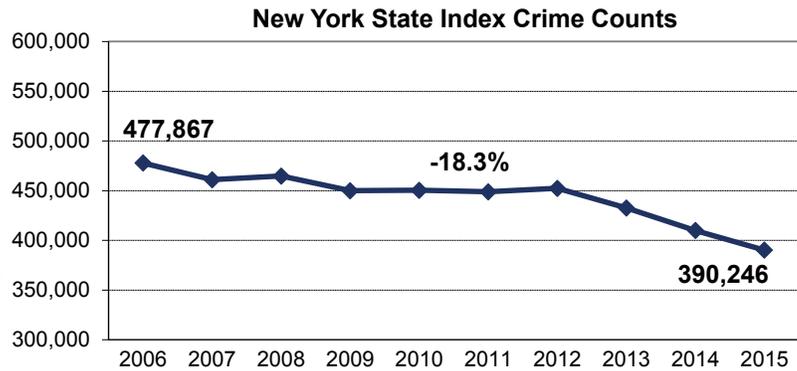

Change in Crime Volume: 2006 vs. 2015

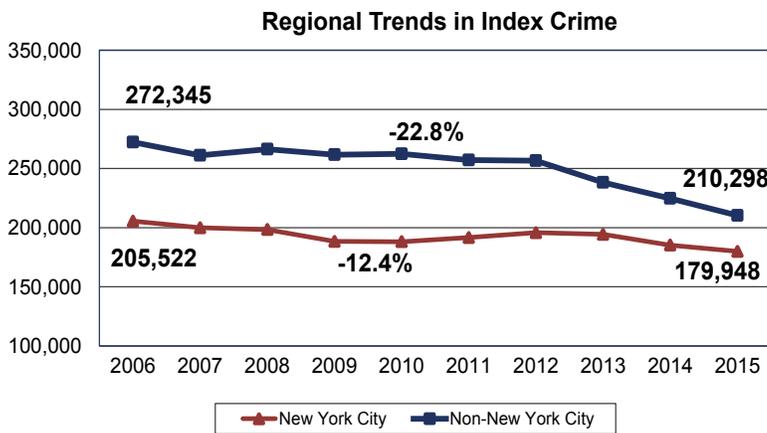

New York State's reduction in crime rate is due to a significant decline in reported crime coupled with an increase in the state's population. In 2015, there were 87,621 fewer crimes reported than in 2006.

Meanwhile, the state's population increased by nearly half a million residents during the 10-year period from 2006 to 2015.

The volume of reported crime statewide also decreased by 18.3 percent when comparing 2006 and 2015. Index crime totals have declined annually since 2012.

Trends in Regional Crime: 2006 to 2015

Index crimes in the state's two regions — New York City (five counties, also called boroughs) and non-New York City (the state's remaining 57 counties) — declined when comparing 2006 to 2015.

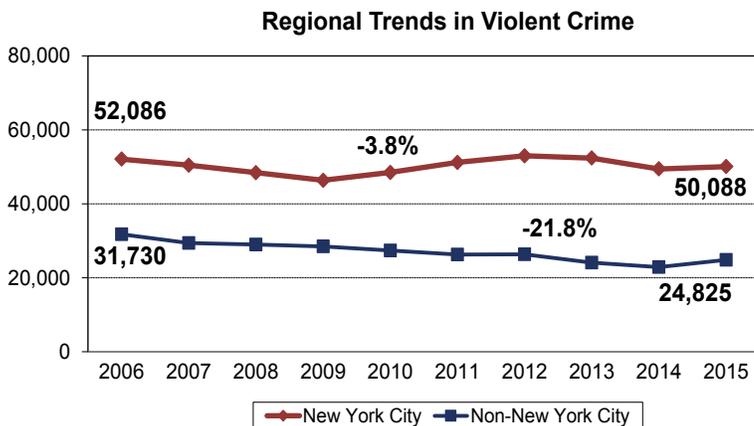

This 10-year period saw a shift in crime trends, with the number of Index crimes reported outside of New York City declining more sharply than those reported in the five boroughs.

Between 2006 and 2015, reported Index crime declined 12.4 percent in New York City and 22.8 percent in the 57 counties Upstate and on Long Island. At the same time, the decrease in violent crime in those 57 counties was nearly six times greater than in New York City: 21.8 percent vs. 3.8 percent.

In addition, violent crime outside of New York City declined annually from 2006 through 2011, and again from 2012 through 2014. In New York City since 2006, violent crime peaked in 2012 and then declined for two consecutive years.

The uptick in violent crime from 2014 to 2015 in both regions was due to the expanded rape definition. The change resulted in 3,534 additional crimes being classified as the Index crime of rape. In years' past, the FBI classified those crimes as Part II sex offenses.

Appendix 6 details those changes.

Statewide Crime Trends: 2014 vs. 2015

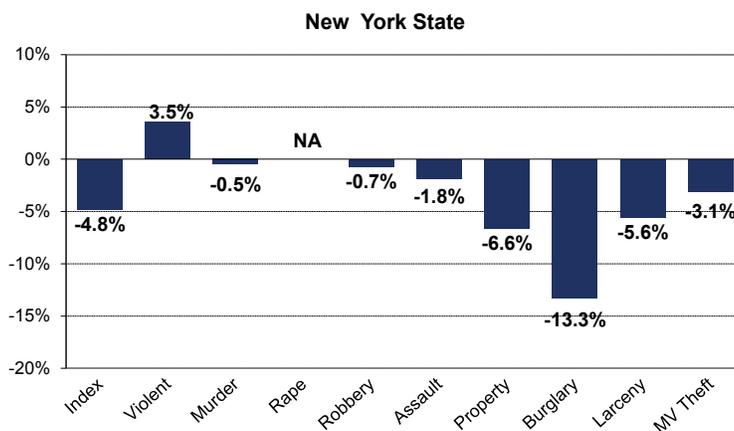

In 2015, the total number of Index crimes reported in New York State decreased 4.8 percent when compared to the year before.

Six of the seven Index crimes declined, with the largest reductions reported in burglary (-13.3%) and larceny (-5.6%).

The 3.5 percent increase in violent crime was caused, in part, by the expanded definition of the rape crime category.

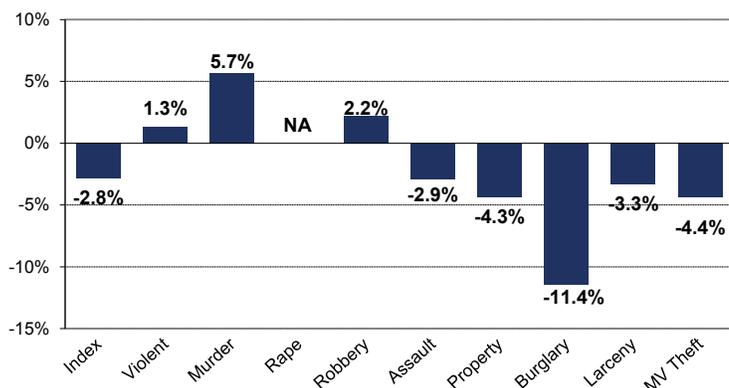

All other violent crimes — murder, robbery and aggravated assault — decreased in 2015 when compared to 2014.

Percentage Change in Crime Volume
2014 vs. 2015

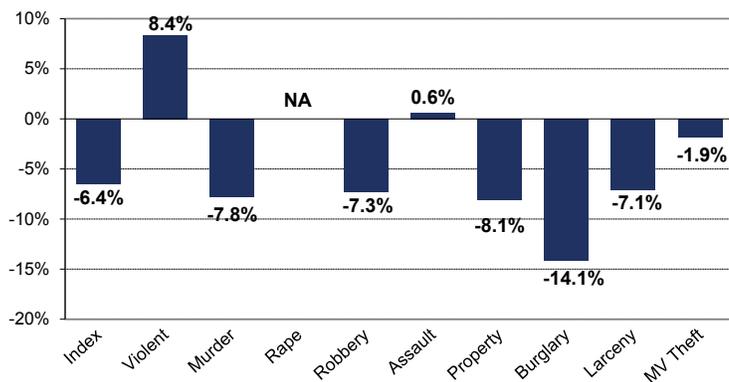

Regional Crime Trends: 2014 vs. 2015

New York City

Non-New York City

The total number of Index crimes in New York City decreased by 2.8 percent when comparing 2014 and 2015.

The reduction in the five boroughs is attributable to fewer property crimes being reported: burglary (-11.4%), larceny (-3.3%) and motor vehicle theft (-4.4%) all declined. In the violent crime category in New York City, reported murders and robberies increased by 5.7 percent and 2.2 percent, respectively. Aggravated assaults decreased by 2.9 percent.

Meanwhile, reported crime in the 57 counties Upstate and on Long Island decreased 6.4 percent in 2015 when compared to the year before. Decreases were reported in five Index crime categories.

In the violent crime category, murder (-7.8%) and robbery (-7.3%) decreased significantly while aggravated assaults increased slightly. Each of the three property crime categories — burglary, larceny and motor vehicle theft — also declined.

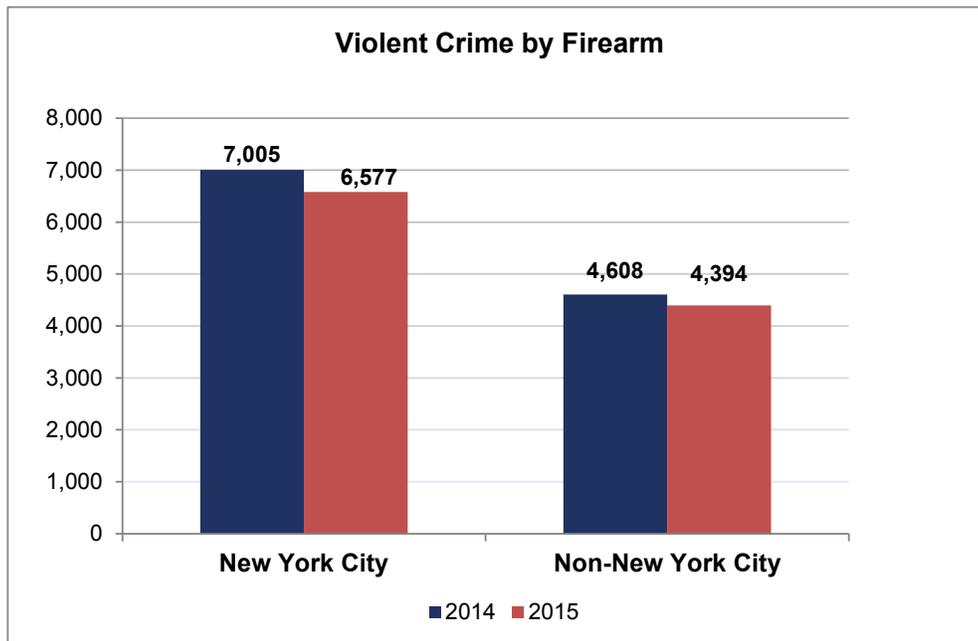

As noted earlier, percentage differences were not calculated for rape in either region because of the expanded definition of the crime.

Appendix 3 lists crime rates by county for 2015. Appendix 7 contains two parts: 7A details crime counts by county for 2014 vs. 2015 using the expanded rape definition while 7B uses the historical definition of the crime to show the county-by-county comparison for those years.

Trends in Violent Crimes by Firearm

Police departments and sheriffs' offices in New York State report to DCJS the number of violent crimes that involved the use of a firearm. In New York City, violent crimes involving firearms decreased by 6 percent, with 428 fewer violent crimes reported in 2015 as compared to 2014.

During the same time frame, violent crimes involving a firearm in the 57 counties outside of New York City decreased by 5 percent, with 214 fewer crimes reported (Appendix 4).

Regional Trends in Homicide

Mirroring the trend in overall Index crime, the number of homicides reported statewide in 2015 reached the lowest point since crime reporting began in 1975. This decline is driven primarily by a decrease in the number of homicides reported in New York City (Appendix 5).

When comparing 2006 to 2015, homicides statewide decreased by 33.9 percent (927 vs. 613). Since 2010, the number of homicides has declined in every subsequent year. Homicides by firearm showed a similar trend, declining 4.9 percent over the past 10 years and 26.2 percent between 2010 and 2015.

New York State Homicides 2006 - 2015											% Change

Appendix 6: Federal Changes in Rape Reporting

The FBI has expanded the definition of rape used by law enforcement agencies when collecting and reporting Index crime statistics through its Uniform Crime Reporting (UCR) program. This change was made to more accurately reflect the scope and volume of sexual assaults nationwide and in New York State, and was fully implemented statewide in 2015.

Prior to the expanded definition taking effect, a violent sexual assault was only classified as an Index crime rape if the victim was a female who had been vaginally penetrated by a male. The federal Justice Department established that limited definition in 1929 and it remained in effect through the end of 2012. During that time, the UCR program classified all other sexual assaults as “Part II” sex offenses, which are not included in the seven Index crime categories used to gauge overall crime trends.

The new definition still includes the historical elements of the crime but the crime of rape now applies to female and male victims and includes the following additional elements: “penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.” A complete list of Penal Law offenses that are now required to be reported as rape are included in Appendix 8. *Please note that certain crimes in that list contain a “T” or “H” designation; those letters reflect that the crimes can be charged as a Hate Crime (Penal Law Article 485) or a crime of Terrorism (Penal Law Article 490). Other letters denote a specific subsection of the law.*

DCJS modified its crime reporting system so it could track offenses historically defined as rape as well as those reported under the expanded definition. This allows New York State to measure the impact of the expanded definition on New York State’s crime trends, using 2015 as a baseline year.

The following tables detail the impact of the expanded rape definition on Index and violent crime counts for 2014 and 2015. A total of 3,534 offenses were defined as rape in 2015 as a result of the expansion, in addition to the 2,572 offenses historically defined as the crime. This change resulted in a 140.6 percent increase in rape between 2014 and 2015. Controlling for the new crimes as a result of the expansion, there was an increase of 1.3 percent in rape between 2014 and 2015.

New York State Index Crime Counts: 2014 - 2015
Historical Rape Definition Applied

The chart on the following page — New York State Rapes by County: 2015 — details the total number of rapes reported broken down by offenses that meet the historic definition of the crime versus those using the expanded definition. Appendix 7 has two parts with additional information: 7A details crime counts by county for 2014 vs. 2015 using the expanded rape definition while 7B uses the historical definition of the crime to show the county-by-county comparison for those years.

Appendix 7: New York State Index Crime Summary by County

This Appendix contains two parts:

7A: New York State Index Crime Summary by County — Expanded Rape Definition Applied

Index and violent crime totals for 2015 include the number of rapes reported under the expanded definition. As a result, this table does not include percentage change calculations for rape counts between 2014 and 2015. Percentage change calculations between 2014 and 2015 Index and violent crime totals should be interpreted with caution, as increases may be due in part to the expanded definition.

7B: New York State Index Crime Summary by County — Historical Rape Definition Applied

Index and violent crime totals for 2015 and 2014 include only those crimes historically defined as rape. As a result, percent changes between 2014 and 2015 rape counts have been calculated.

Appendix 8 details the Penal Law crimes reported as rape under the historical definition and the additional crimes now included in the expanded definition. *Please note that certain crimes in that list contain a “T” or “H” designation; those letters reflect that the crimes can be charged as a Hate Crime (Penal Law Article 485) or a crime of Terrorism (Penal Law Article 490). Other letters denote a specific subsection of the law.*

PLEASE NOTE:

Data included in this report differ slightly from those published by the FBI, as that agency estimates Index crimes for agencies with incomplete reporting, and excludes data submitted after FBI deadlines.

In addition, New York State’s 2014 rape counts as published by the FBI in its “Crime in the United States” report are incorrect due to a calculation error. This error resulted from the FBI’s use of a formula to estimate rape counts for each state because of the change in the definition of the crime.

	% change	-6.9%	38.9%	NA	NA	-100.0%	41.7%	-9.6%	7.7%	-13.8%	-71.4%

Note: The increase in the violent crime total in 2015 is attributable in part to the expanded crime category of rape (see Appendix 6).

Note: NA indicates that the percentage change is not applicable because the count in 2014 was zero. All percentage changes for rape are also NA. 2015 data cannot be compared to 2014 due to the expanded definition of rape.

*Schenectady City PD identified a discrepancy in the number of crimes submitted to DCJS in 2015 that was not resolved at publication of this report. As a result, the preliminary number of Index crimes presented for Schenectady County may be lower than the actual number of offenses reported to law enforcement in 2015.

Source: DCJS, Uniform Crime/Incident-Based Reporting system.

Includes all reports received as of 9/6/2016.

	% change	-7.8%	22.2%	NA	25.0%	-100.0%	41.7%	-9.6%	7.7%	-13.8%	-71.4%

Note: NA indicates that the percentage change is not applicable because the count in 2014 was zero.

*Schenectady City PD identified a discrepancy in the number of crimes submitted to DCJS in 2015 that was not resolved at publication of this report. As a result, the preliminary number of Index crimes presented for Schenectady County may be lower than the actual number of offenses reported to law enforcement in 2015.

Source: DCJS, Uniform Crime/Incident-Based Reporting system.

Includes all reports received as of 9/6/2016.
